Director's Report

Greetings everyone and Happy Holidays! As of December 10th the PROACT Huntington facility welcomed Valley Health as a full time occupant of the building alongside the Marshall clinic. We have had a total of 152 intakes since our opening and Valley's presence on the 10th effectively doubled our population served.

Of the 152 intakes, 70 of them were female and 82 of them were men. They were all Caucasian except for 4 African American females.

November intakes, our second month of operation, saw a 24% increase from the previous month.

Our intakes have ranged in age from 21 to 77 with the average age being 37 and the majority of individuals (113) being between ages 25-44.

Our referrals remain mostly self-referred walk-ins, but we did have 34 community referrals.

November referral sources remained consistent with October's, with self-referrals accounting for the majority of the increase in intakes.

The majority of our intakes (134) continue to request referral for MAT services, mostly Suboxone, though 11 requested Vivitrol. Withdrawal management services were requested in 3 of the cases, Residential Treatment referral in 2 cases, and 11 individuals requested abstinence based treatment services. One individual did not return following their intake and one was undecided at time of intake.

Referrals for MAT services in November increased by 33% over what they were in October.

Opioids remain the primary drug type noted with heroin comprising 122 of the cases. Methamphetamine was mentioned in 33 (22%) of the cases and 8 of the individuals disclosed that they had been using primarily Suboxone illegally prior to admission to our program.

Reports of heroin use increased by 27% in November with illicit Suboxone use being reported in 6 of the cases, a 300% increase from October. Reports of alcohol and other opioids decreased from the previous month.

The majority of our intakes have reported only a single drug of use, but, 31% of the cases reported polysubstance use.

APPRECIATION

I want to express my appreciation to all the staff for their outstanding work and dedication and to our board members for supporting this great cause.
